

TOP TRAIL PICKS

Category		Trail Name	Description	Area / Getting There
Starting Out		High Tide	At the base of CB, this is where every beginner will make their first turn	Base area, take the Peach Tree chair
Easy Scenic		Houston	Longer, gentle run; takes you to Painter Boy Lift with access to Umbrella Bar and some of CB's most famous views	Exit Silver Queen to the right
Longest		Peak to Treasury	Enjoyable 2.6 mile groomer from the Peak to the East River. Once there, try some of the runs to the lookers left off of The East River Lift	Take Silver Queen to the top and exit to the right
Groomer		Lower Treasury	A great place to practice your carving, esp. since some of the slopes further up can be crowded (by CB standards!)	Exit East River lift to the left, ski to the bottom of the hill and turn right (watch for folks coming from the skier's left)
Bumps (Learning)		Black Eagle	A little out of the way, but ideal for practicing your bumps without too many witnesses	Exit the East River Lift to the right
Steeper Groomer		International	Work up some speed here; If you get bored of the groomer, try the bumps on the right of the slope to mix it up	Exit Silver Queen to the right; follow Ruby Road to the end
Glades (Steeper)		Gully Glades Area	Discover different lines and work your way in and out of the trees here. Stay to the skier's right for the trees (Double Top Glades has less trees)	Exit East River Lift to the left. Leave the rescue hut (with the avalanche dog) on skier's right and dive in to the trees
Bumps (Advanced)		Resurrection	This is serious mogul skiing. The only drawback is that you are right under the chairlift - the temptation to show off may affect your performance!	Exit East River Lift to the right and switch back under the chair
Chutes		Tower 11 Chutes	Usually one of the first true Double Blacks to open for the season. TIP- don't ski fresh powder here - there are a lot of hidden rocks - let those who know it go first!	Stay to the skier's right of Paradise Bowl, along a short cat route. Scope it from the Paradise Lift (literally at Pole 11) to make sure you are up for it
Journey		Funnel	Once you're made it here, funnel down into a 20 ft wide corridor with a massive 100 ft tall rock formation skier's right before opening out again on to sunset ridge	Take the Silver Queen and access the Banana High Entrance from just beow the lift; then follow the long (and scary) traverse to Funnel - If you're nervous by the time you get to Flatiron, bail there, the entrance to Funnel is much harder
Steep & Deep (w/ hiking)		Teocalli Bowl	It's hard to choose - Third Bowl and Spellbound are phenomenal but Teocali remain our favoite. There are so many lines to ski - Main Street, Town Park, Wolf's Lair	Take the High Lift Poma and hike up to the bench just above Duey's Run; also be ready for the 15-20 min hike out
Fresh Powder		"Cat Skiing"	Snow cat groups depart daily from the town of CB. Not cheap, but well worth it. One of the largest cat skiing areas in the US and the area receives 5x as much snow as CB mountiain - a once in a lifetime exprience	Reserve a space on the cat with Irwin Guides
