

Category		Trail Name	Description	Area / Getting There
Easy Scenic		Wrangler	Long gentle slope providing spectacular views of the terrain and surrounding valley	Exit left off of the Black Mountain Express; stay above the Black Mountain Lodge
Warming Up		Dercum's Gulch	Solid warm-up from the Summit; open, flowing run, ideal for groups that want to split and hit the East/West Walls	Exit the Lenawee Mountain Lift to the left, take Lenawee Face and look out on the skier's left to connect
Bumps (Learning)		West Wall	For Intermediates looking to practice on something steeper, the West Wall offers bumps, slots, and powder	Exit Lenawee Mountain Lift to the right; follow Cornice Run and look out on skier's right; lets out to Dercum Gulch
Burner		Lenawee Parks	Drop in off of Dercum's Gulch to some steeper and bumpy Blues that dump into tree glades	Stay to the skier's right at the start of Dercum's Gulch; cut in just after crossing the Lenawee Mountain Lift
Scenic Cruiser		Columbine / Larkspur	Explore Montezuma Bowl (the Backside) with these runs; both start open and have sweeping views before funneling into the trees; for a greater challenge, try Log Roll or Placer Junction chutes	To reach Montezuma Bowl, push over the Summit to the Backside; take laps using the Zuma Lift; *south and west west facing so it can be crunchy in the mornings
Groomers		Loafer or Davies	Perfect for a warm up in the Beavers; Loafer runs along the ridge and allows you to survey the landscape. Davis is the best for a warm up before diving into the surrounding glades	From the Summit facing the Front side, head to the skier's left; stay high for Loafer For Davis, take Cornice run and look out on skier's left
Showing Off		Exhibition	Aptly named, work up some speed while warming up on and looking cool under the Black Mountain Lift	Under the Black Mountain Express lift
Burner		Long Chute	Great warmup route into the Montezuma Bowl; perfect for getting your bearings before doing laps along Zuma Cornice or Mountain Goat Traverse	Push over the summit via the Lenawee Mountain Lift and drop into the Montezuma Bowl
Bumps (Advanced)		Bailey Brothers	Lives up to its name, this feels like a circus ride/roller coaster with all the uneven and teasing moguls	Take your pick from the Summit to enter the Beavers, most runs converge at the top of this run
Fresh Powder		Tieze's Claim	The lookers right face of the Mountzuma Bowl offers open, steep bowl skiing that drops into the Black/Blue forests below. You may be the only one to make it here all day!	Exit the Zuma Lift and stay right along Mountain Goat Traverse (*The further out you go, the more alone you will be)
Steep		Gauthier	Prior to The Steep Gullies expansion, Gauthier created A-Basin's western edge; with a pitch of 46 degrees, get ready to carve	Exit the Pallavicini Lift to the right and take Palli Cornice (make sure to stay left of The Steep Gullies entrance); avoid going too far or you may be hiking back to the lifts
Steep & Deep (w/ hiking)		Upper/Lower East Wall	The East Wall is famous for being A-Basin's steepest and highest terrain; here you will find powder, 30-40 degree hike-to-chutes and open bowls	Left off Lenawee Mountain Lift and follow signs to hiking/entrance gates; For the East Wall, the Lazy J tow can take you to the lower traverse/first hike. For the upper portion, there are two hikes, North Pole and Willy's Wide, both ~30 minutes if you are in hiking shapre
Chutes		Pallavicini	Take Main Street for access to some of the most legendary terrain of all; pick your lines on either side with trees (Timber Glades), chutes and /or boulders (Rock Garden)	Exit Pallavicini Lift to the right and take Palli Cornice / Pali Main Street
Glades		the "Alleys"	This was the western edge of the original mountain; if you can conquer the 2nd, 3rd, 4th, and 5th alleys, someone in your group owes you drinks at the 6th Alley Bar at the base!	Exit the Pallavicini Lift the right to Palli Cornice; then stay to the right of The Steep Gullies entrance
Fresh Powder		Zuma Cornice	Be prepared for deep snow. The hike to Gentling's Glade has spectacular, 360 degree views and the slope down is a little more forgiving than that of Jump (as long as you are a good tree skier). Be warned, finding the entrance to Gentlings is tricky and all of these slopes are for experts only, require hiking at altitude (quite a way) and there's no turning back	Get to know the terrain here with an easy ride down one of the groomers in Montezuma bowl; For the best tree experience, hike beyond Jump (probably the steepest line in Montezuma bowl and also worth a shot) to Gentling's Glade. First timers, it's best to go with someone who knows the area
